Kit, First Aid, Small, Aviator

SOURCE: Tokyo, Japan.

IMPORTANCE: Not previously reported.

DESCRIPTION: This kit consists of a leather case, 7 1/4" x 4 3/4" x 2 3/8", with a metal lock and a leather handle 5" long. The Japanese nomenclature on this case is "Aviator Portable Case" and was first made in the 16th year of Showa or 1941.

The kit is supposed to contain the following items:

- | | |
|-------------------------------|------------|
| 1. Tincture of Iodine in tube | 10 tablets |
| 2. Digestive tablets | 10 tablets |
| 3. Kokakora tablets | 10 tablets |
| 4. Aspirin tablets | 10 tablets |
| 5. Bandage | 1 package |
| 6. Roll bandage #3 | 1 roll |
| 7. Absorbent cotton | 1 package |
| 8. Cotton roller - bamboo | 1 |
| 9. Safety needles | 5 |
| 10. Corrosive sublimate gauze | 2 packages |

The case is so constructed that other items may be added if necessary.

COMMENT: Neither the case nor the contents are of any Medical Intelligence importance and the item is inferior to the corresponding one used by
